

Quarterly Uptime Report

Summary

This report summarizes service availability for the first quarter. All tracked services met their availability targets. Two services recorded minor incidents, neither of which breached the service level objective.

Service Metrics

The table below lists uptime and incident counts for each tracked service over the quarter. Uptime is measured against the published maintenance windows.

Service	Uptime	Incidents	Notes
Gateway	99.95%	1	Brief restart during a deploy.
Database	99.99%	0	No incidents this quarter.
Cache	99.80%	2	Two evictions under peak load.
Search	99.90%	1	One reindex pause overnight.

Notes

Incident counts include only events that paged the on-call engineer. Planned maintenance is excluded from the uptime figures.
